

BIGMART SALES PREDICTION USING MACHINE LEARNING

DATASET INFORMATION

The data scientists at BigMart have collected 2013 sales data for 1559 products across 10 stores in different cities. Also, certain attributes of each product and store have been defined. The aim is to build a predictive model and find out the sales of each product at a particular store.

Using this model, BigMart will try to understand the properties of products and stores Which play a key role in increasing sales.

Variable	Description
Item_Identifier	Unique product ID
